

A MY4MLIFE FIELD GUIDE · FREE EDITION

The Fast Start Guide to Gut Repair

Bloating. Brain fog. The 2 p.m. crash. Gut damage doesn't stay in the gut — it degrades the organ that makes you *you*. This guide gives you the exact protocol to start repairing it this week: what to take, how to dose it, and the seven-day fast start.

Dr. TJ Mundheim, DC & the My4MLife clinical team

my4mlife.com · Begin with the end in mind.

Educational material — not medical advice, diagnosis, or treatment. Prescription therapies are prescribed solely by licensed physicians through our independent telemedicine partner after individual evaluation. Talk to your physician before starting any new supplement, especially if you are pregnant, nursing, taking prescription medication, or managing a chronic condition.

Why gut repair is brain repair

Your gut and your brain are one system running on one supply line. When the gut lining is damaged, the brain pays the bill.

- **About 90% of your serotonin** — the neurotransmitter behind mood and calm focus — is produced in the gut, not the brain.
- **Roughly half of your dopamine** — drive, motivation, reward — is synthesized there too.
- **The vagus nerve is a two-way highway** between gut and brain. An inflamed gut sends inflammatory traffic upstream, all day, every day.
- **The damage cascade:** processed food, seed oils, alcohol, stress, and medications thin the mucosal barrier → the tight junctions between intestinal cells loosen ("leaky gut") → particles cross into the bloodstream that never should → the immune system reacts → chronic low-grade inflammation reaches the brain as fog, fatigue, low mood, and — over years — accelerated cognitive decline.

Why probiotics alone haven't fixed it

Most people reach for a probiotic and feel nothing. Seeding new bacteria into a damaged, inflamed lining is planting seeds in scorched soil. **The lining has to be repaired first.** That is what this protocol does — it rebuilds the barrier itself, then everything else you do for your health finally has a foundation to work on.

THE CORE IDEA

Repair the gut lining → quiet the inflammatory traffic to the brain → mood, focus, energy, digestion, and long-term brain health all improve from the same single intervention. You can't out-supplement a damaged supply line.

The protocol — two tiers, one goal

Everyone starts on the foundation powder. Deeper repair adds a prescription peptide on top. They work together — the Rx is an add-on, not a replacement.

Tier 1 — Biome NS Ultra (over-the-counter powder)

Eight ingredients that attack gut-barrier damage through independent mechanisms at once — fuel for the cells that rebuild the lining, soothing of the mucosal surface, calming of the inflammation, and support for the tight junctions. No single-ingredient product covers this ground.

INGREDIENT	AMOUNT	WHAT IT DOES
L-Glutamine	5 g	The primary fuel for enterocytes — the cells that rebuild your gut lining
DGL (licorice extract)	300 mg	Soothes and protects the mucosal surface
Berberine	200 mg	Supports a healthy microbial balance and metabolic response
Aloe vera (acemannan)	75 mg	Coats the lining; supports absorption of the other actives
Curcumin	50 mg	Calms the inflammatory cascade at the barrier
Zinc carnosine	10 mg	Stabilizes and repairs tight junctions
Vitamin A	1,000 IU	Epithelial (lining) integrity
Vitamin D3	1,000 IU	Immune regulation at the gut barrier

Tier 2 — Biome NS Rx (prescription add-on)

Biome NS Rx is our proprietary compounded gut-repair prescription — written by a licensed physician to your individual needs. It works the deeper repair the daily powder can't reach, taken *concurrently* with it. The formulation is proprietary to My4MLife — you won't find it anywhere else. Prescription-only: a physician evaluates whether it's right for you and tailors it to you.

Exactly how to take it

Biome NS Ultra — daily, with your first meal

- 1 scoop stirred into 8–12 oz of water, once daily.
- take it
- the lining rebuilds through daily exposure. Take it every day, including weekends. If you miss the first meal, take it with your next one — don't skip the day.
- run it daily for a minimum of 4 weeks; most people continue as a daily foundation. The insults that damaged the lining (stress, processed food, medications, age) don't retire — the repair signal shouldn't either.

Biome NS Rx — proprietary, physician-directed

- proprietary and — no fixed off-the-shelf recipe, which is exactly the point.
- typically prescribed as a 4-week repair cycle.
- taken concurrently with your daily Biome NS Ultra — additive, not redundant.
- a telemedicine consult with a licensed physician (start at). If prescribed, it ships from a licensed compounding pharmacy.

What to expect, week by week

WEEKS	WHAT MOST PEOPLE NOTICE
Week 1	Less bloating after meals; digestion begins to settle.
Week 2	Steadier energy; the afternoon crash softens.
Weeks 3–4	Clearer head, better mood stability, more consistent sleep — the brain side of the gut-brain axis responding.
Beyond	Repair compounds. This is a foundation, not a 30-day fix.

Individual results vary. If you experience persistent digestive pain, blood in stool, unexplained weight loss, or symptoms that worsen — see a physician promptly. Those are not "push through it" signals.

The 7-day fast start

The powder repairs the lining. These seven days stop you from re-damaging it while it heals. Check each one off.

- DAY 1** ☐ **Start Biome NS Ultra** with your first meal. Drink water through the day — repair is hydration-dependent.
- DAY 2** ☐ **Purge the seed oils.** Canola, soybean, sunflower, safflower, corn oil — check your pantry and your takeout habits. These are the most consistent everyday insult to the gut lining.
- DAY 3** ☐ **Protein-first breakfast** — open the day with 30–40 g of lean protein (eggs, meat, fish, Greek yogurt). Protein carries the raw material the lining rebuilds with.
- DAY 4** ☐ **Give eating a start and an end.** Try a 9 a.m.–6 p.m. eating window today. No food within 3 hours of bed — late eating is a double hit on gut repair and deep sleep.
- DAY 5** ☐ **Walk 30 minutes after your largest meal.** Post-meal movement improves glucose handling and motility — the gentlest gut therapy there is.
- DAY 6** ☐ **Alcohol-free day.** Alcohol directly erodes the barrier you're paying to rebuild. Notice how you sleep tonight versus a drinking night.
- DAY 7** ☐ **Real-food day.** Single-ingredient foods only — meat, fish, eggs, vegetables, fruit, rice. If it has a mascot or a health claim on the box, it waits.

THE ONE RULE THAT CARRIES THE WEEK

Take the powder every day, and remove one insult at a time. You don't have to be perfect on all seven — you have to be consistent on the powder and directionally better on the rest. Repair rewards the man or woman who simply keeps showing up.

Where to go from here

You have the protocol. Here are the three ways people put it to work — pick the one that fits where you are.

1 • Start the foundation today

Order **Biome NS Ultra** and begin the 7-day fast start this week. It ships to your door, and this guide comes free with every order.

→ my4mlife.com/go/gut-repair

2 • Add the prescription tier

Want Biome NS Rx — our proprietary deeper-repair prescription — evaluated and written for you? Start a telemedicine consult with a licensed physician — no cost to ask the question.

→ my4mlife.com/rx/leaky-gut

3 • Get your full picture — free

Gut repair is the foundation. The free 5-minute assessment shows where gut health sits among all the factors driving your energy, focus, and long-term brain health — and what to work on in what order.

This guide is for anyone

Gut repair isn't gendered — the protocol in these pages works the same for men and women. Share it with anyone whose energy, mood, digestion, or focus isn't what it used to be. The first act of taking your brain seriously is repairing the supply line that feeds it.
